**An observatory  
on hydrosystems and  
social dynamics linked  
to water**

## A researchers and partners network

- a scientific label of the CNRS
- 24 Universities, schools or research organisations
- 300 researchers

- Comprendre et évaluer les interactions au sein de l'anthroposystème
- Apporter des éléments d'aide à la décision publique en matière de gestion durable des cours d'eau et de leurs bassins versants

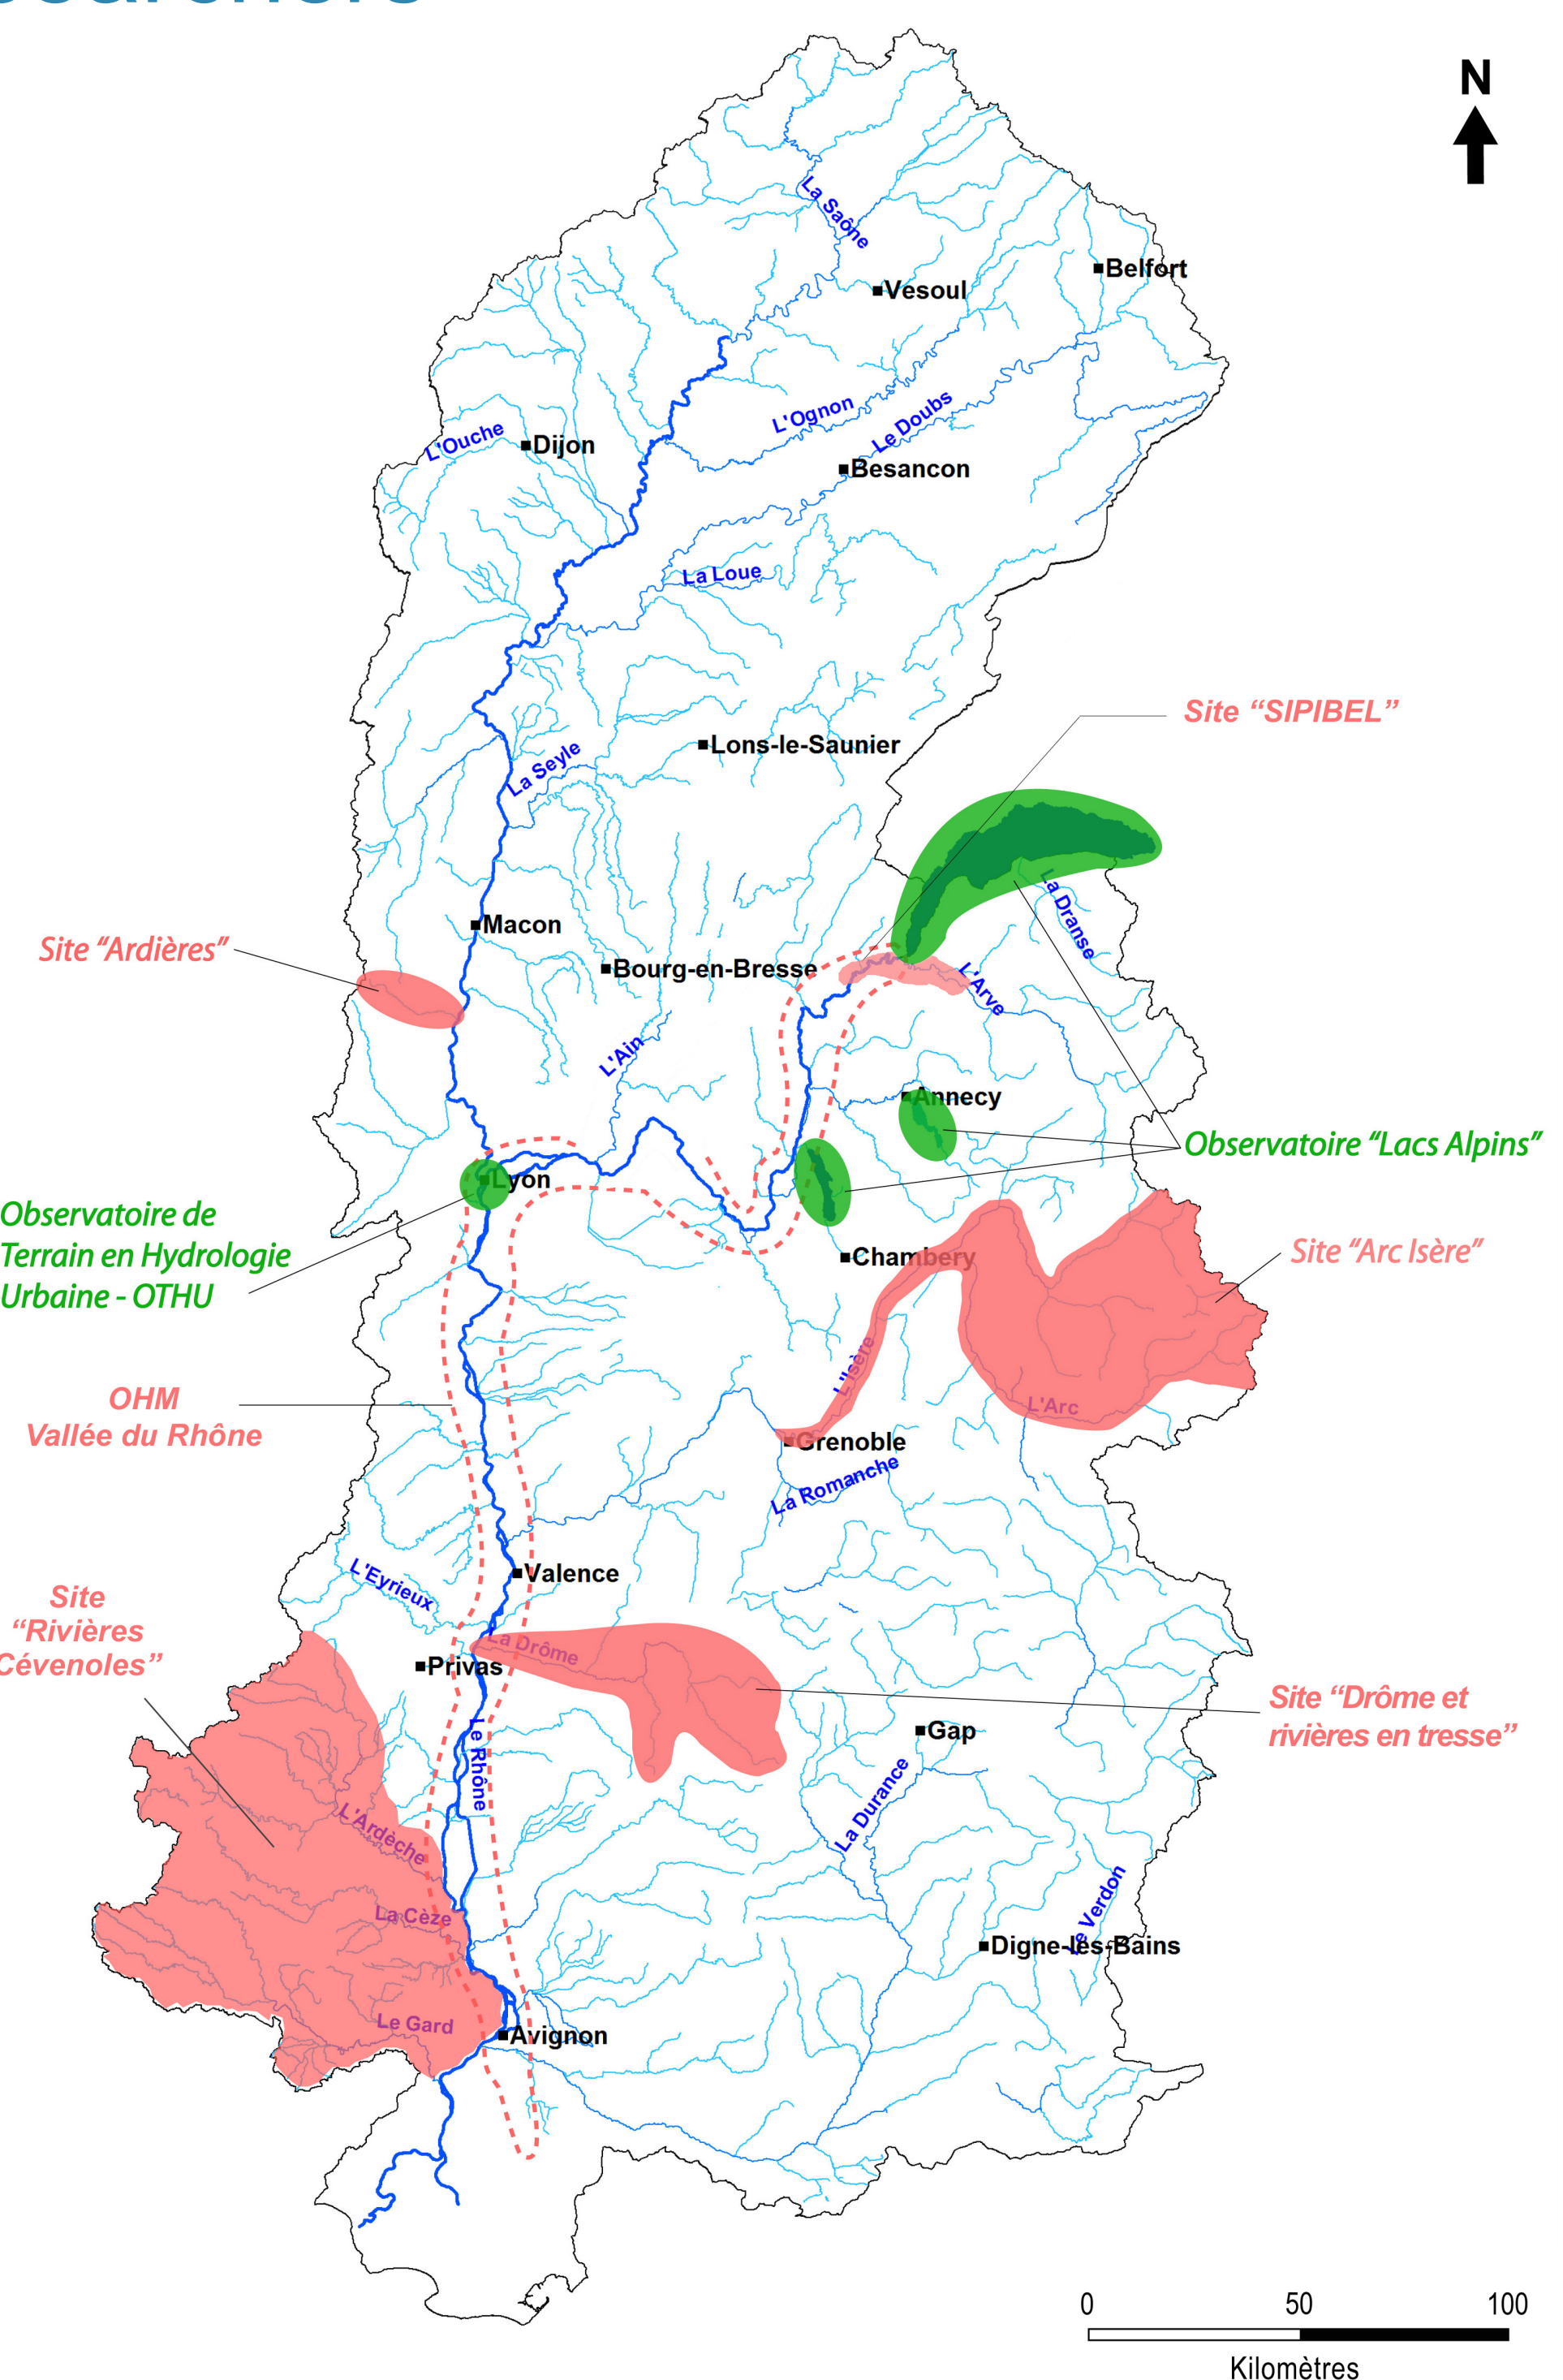

- Changements climatiques et ressources
- Flux, formes, habitats, biocénoses
- Flux polluants, écotoxicologie, écosystème
- Observation sociale des territoires fluviaux

- Formalisation des attentes
- Mise en relation
- Mise à disposition des résultats de la recherche

It aims to provide to the decision makers a methodology to evaluate the effects of watersheds rehabilitation or restoration on river hydrosystems operating

- Climatic change and resources
- Flows, forms, habitats, biocoenosis
- Pollution flows, ecotoxicology and ecosystem
- Social observation of river territories

- Co-ordination of scientific and technical workshops
- To look for a correct adequacy between developed research programme and social concerns expressed by professionnals
